Contact jean@greatmountainforest.org or call the Norfolk Library (860.542.5075)

Wolves? ...in New England?

Professor Todd K. Fuller

Department of Environmental Conservation
University of Massachusetts Amherst

Dr. Fuller and his graduate students and post-doctoral associates have studied the life history, distribution, and density of mammals throughout the world. Some of his earliest and most influential work centered on the gray wolf (*Canis lupus*). This lecture will explore the challenges and opportunities for this species in our region.
